

Free printable · Shapes · Ages 3 to 6

Build Wobblin a Bed

Wobblin is sleepy and needs a bed! Shape puzzles and picture mats for putting shapes together.

What's inside

- Shape puzzles: make a square, rectangle, circle and hexagon from smaller pieces
- The same puzzles without lines, for a challenge
- Build Wobblin's bed and house from cut-out shapes
- Draw a friend for Wobblin with shapes

Tips for grown-ups

- Cut the pieces out ahead of time if scissors are tricky.
- Print the pieces on card so they're easier to handle.
- Turning and flipping pieces is the learning. Let them try first.
- Store pieces in a zip bag for next time.

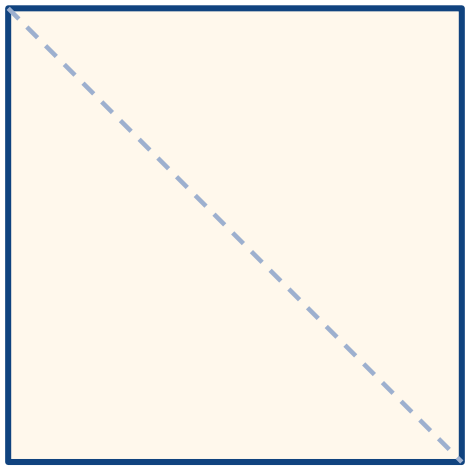
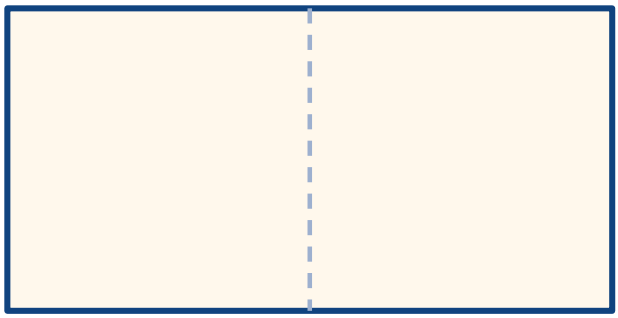
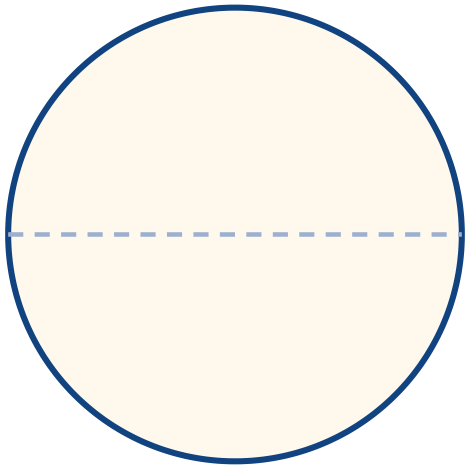
Put the pieces on top to make each shape!



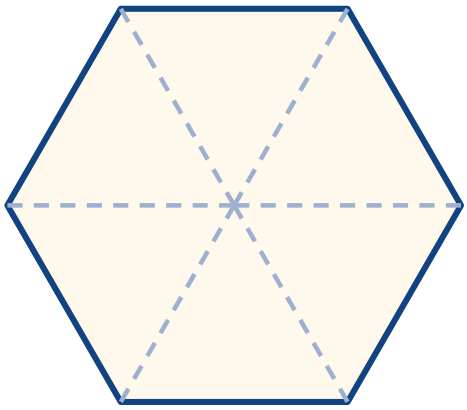
A square from 2 triangles



A rectangle from 2 squares



A circle from 2 semicircles



A hexagon from 6 triangles

Grown-up tip: Start with the lines page. Turning and flipping pieces to make them fit is exactly the skill. Let your child try before helping.

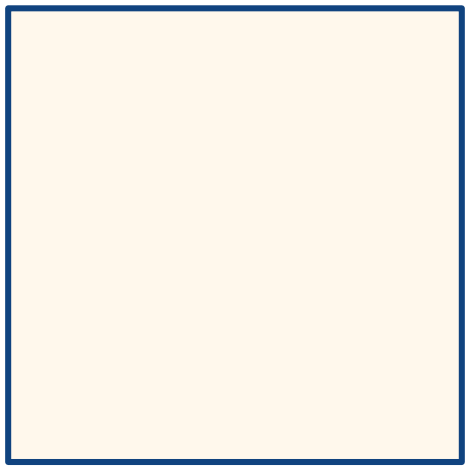
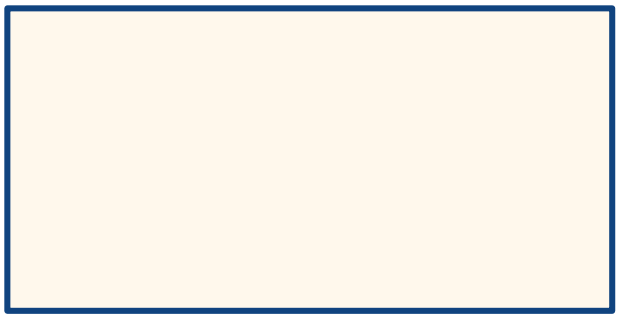
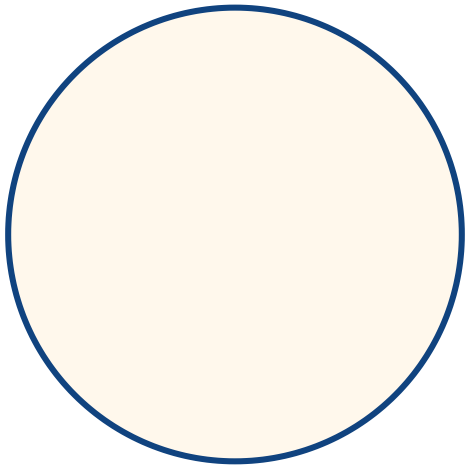
Hmm, the lines are gone! Can you still make each shape?



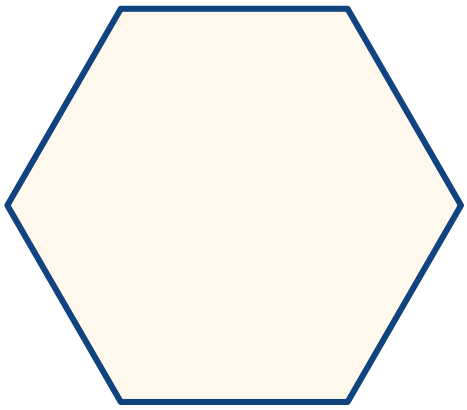
A square from 2 triangles



A rectangle from 2 squares



A circle from 2 semicircles



A hexagon from 6 triangles

Grown-up tip: Turning and flipping pieces to make them fit is exactly the skill. Let your child try before helping.

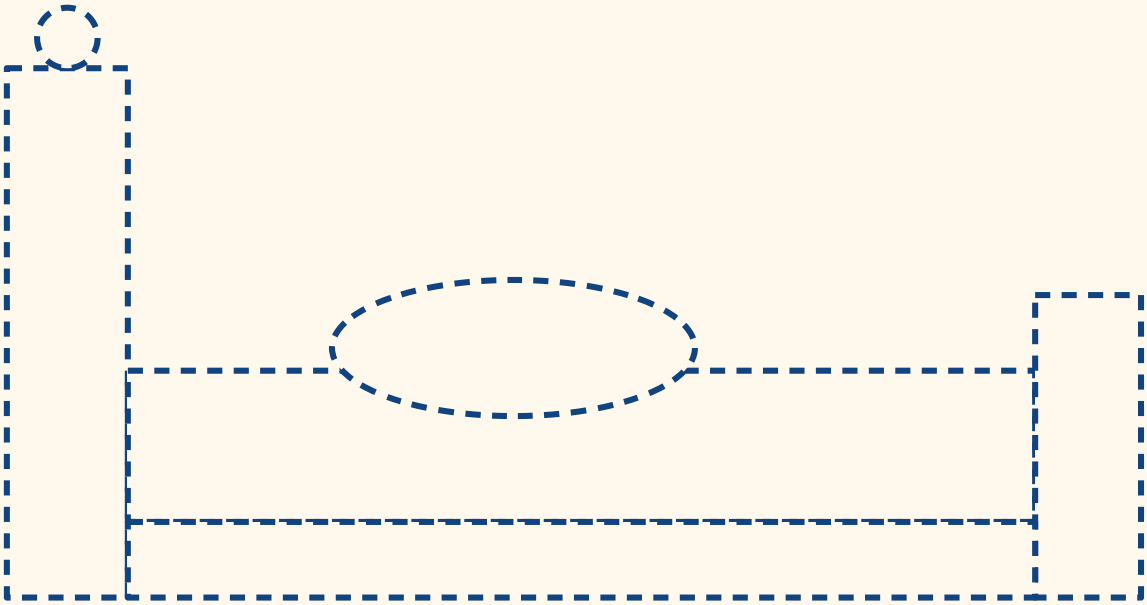
Build me a bed! Put each piece on its matching shape.



Grown-up tip: Name each piece as your child places it: "The mattress is a long rectangle." Then ask what other shapes they can see.

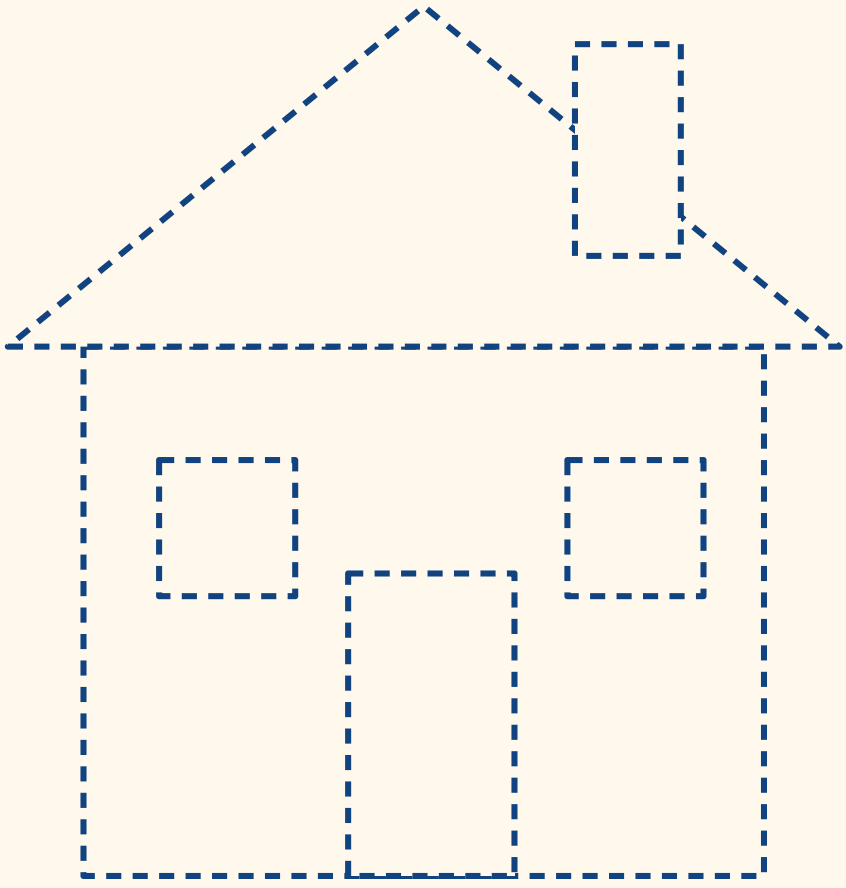
Now build my little house!



Grown-up tip: Name each piece as your child places it: "The mattress is a long rectangle." Then ask what other shapes they can see.

© 2026 EarlyChildhoodEduNet · earlychildhoodedu.net · Free for personal and single-classroom use

Cut out the pieces for the bed and the house.

✂ Cut around each piece. Colour them in first if you like!
